Product

Chicago Ironer

*High production Muti-Roll deep
 chest ironers.
*Excellent finishing performance.
*High performance steam traps
 for maximum utility efficiency.
*Excellent energy-saving design.
*High speed industrial ironer
 designed to live up to the quality
 of the Chicago name.
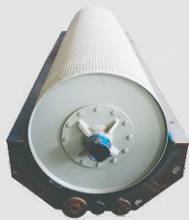

▲ Model Century3200

Direct Drive

Option

*Auto speed control

*Easi-feed suction feeding aid

Features

*CSEI inspected, certified and stamped steam
 heated steek chests.
*The rigid groove has undergone precision
 machining and special polishing treatment,
 making it durable and long-lasting.
*Adopting a large wrap angle design, after heating,
 the contact area with the roller is large, resulting in
 high work efficiency.

*Rolls can be raised and pneumatically locked in
 extra-wide open position for easier maintenance and access.

*The pressure on both sides of the roller can be adjusted to
 ensure even force on the fabric, and it is not easy to deform
 during the ironing process, ensuring high-quality ironing effect.

Equipped with imported high-quality springs and hot felt.

Individually adjustable exhaust blower and motor for
each roll, and equipped with high-quality drain valves,
high thermal conductivity efficiency, reducing steam loss.

Heavy duty variable speed drive motor, Stable and
stepless speed regulation is achieved between each
slot or folding machine to better stretch and extend the
fabric, ensuring the quality of fabric ironing.

Complete protection with finger guards for emergency.

Lift-off insulated top retains heat canopy.

Available in a choice of 32"(800mm),42"(1050mm) or
52"(1300mm) .

Diameter rolls, available in 1 to 4 rolls.

Product

Chicago Folder

America's best selling

*Best in folding precision.
*Outstanding accuracy.
*The most advanced control technology offers you better effciency.

▲ Model **S13**

Advanced CHI-TOUCH Control
(Available in Chinese or English)

*Two primary folders with three crossfolds.

*Available in 1 to 4 or more lanes of primary folding.

*Available in a choice of120"(3050mm),130"(3300mm) or 136"(3500mm) working width.

*Advanced CHI-TOUCH PC based control system.

*The first longitudinal folding adopts a mechanical knife and two rough surface cloth clamping rollers, with smooth guide and clear and neat creases; Suitable for various sizes of linens, can accept up to 40 "(1015mm) to reduce linen blockage.

*Unlike traditional speed wheels that measure the length of linen, two intelligent optical sensors are used to ensure alignment

*Single shockless static eliminator bar with power supply.

*All measurements made by self-cleaning photo sensors with LED indicator.

*Start/Stop button pauses and restarts operation without interrupting folds in progress.

*Side slide-out and rear receiving tables.

*Split input feed conveyor allows faster, easier and more accurate feeding than ever.

*Self-contained motor drive for conveyor eliminates numerous mechanical parts, reduces maintenance requirements, improves efficiency, and offers an expanded range of delivery heights.

*Chicago Automatic Reject Processor bypass system-allows operator to reject stained and tomn items to separate area for rewash or sewing.

*Programmable feed conveyor pause assists with feeding difficult specialty items such as scrubs and aprons that typically require additional handling.

*Maximum piece folded size 36"x106" (915mmx2700mm).

*Folded items are stacked on delivery conveyor which can be installed in a choice of discharge directions.

*Advanced CHI-TOUCH PC based control system.

*Powered item width adjustment.

*Total piece counts displayed by item category.
